The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint38< TSource, TObjecTag > >`, is shown in a white box with a black border. The derived class, `cl_move_base_z::EvWaypoint38< TSource, TObjecTag >`, is shown in a gray box with a black border. A blue arrow with an open triangle head points from the derived class to the base class. The derived class has a public attribute `+ waypointIndex`.
