

```
boost::statechart::  
event< EvWaypoint150  
< TSource, TObjectTag > >
```

A UML class diagram showing an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint150 < TSource, TObjectTag > >`, is represented by a white box with a thin black border and is divided into three horizontal compartments. The top compartment contains the class name, the middle compartment is empty, and the bottom compartment is empty. The derived class, `cl_move_base_z::EvWaypoint150 < TSource, TObjectTag >`, is represented by a gray box with a thick black border and is also divided into three horizontal compartments. The top compartment contains the class name, the middle compartment contains the public attribute `+ waypointIndex`, and the bottom compartment is empty. A blue arrow with an open triangular head points from the top compartment of the derived class to the top compartment of the base class, indicating inheritance.

```
cl_move_base_z::EvWaypoint150  
  < TSource, TObjectTag >
```

```
+ waypointIndex
```
