

boost::statechart::  
event< EvWaypoint214  
< TSource, TOrthogonal > >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvWaypoint214< TSource, TOrthogonal > >"]
    class cl_move_base_z_EvWaypoint214["cl_move_base_z::EvWaypoint214< TSource, TOrthogonal >"]
    cl_move_base_z_EvWaypoint214 --|> boost_statechart_event
```

The diagram illustrates an inheritance relationship. A blue arrow with an open triangular head points from the bottom class to the top class. The top class is defined in a white box with a thin grey border, while the bottom class is in a grey box with a thick black border. Both boxes are divided into three horizontal sections. The top section of the white box contains the class name. The top section of the grey box contains the class name and its template arguments. The middle section of the grey box contains a public member variable. The bottom sections of both boxes are empty.
