

```
boost::statechart::  
event< EvCountdownEnd  
< TSource, TObjectTag > >
```

The diagram shows two class boxes. The top box is white and represents the base class `boost::statechart::event< EvCountdownEnd < TSource, TObjectTag > >`. The bottom box is gray and represents the derived class `smacc::state_reactors::EvCountdownEnd< TSource, TObjectTag >`. A blue arrow with an open triangular head points from the bottom box to the top box, indicating inheritance.

```
smacc::state_reactors  
::EvCountdownEnd< TSource,  
TObjectTag >
```
