

sm_dance_bot::cl_service3
::CbService3::onEntry

```
graph LR; A["sm_dance_bot::cl_service3  
::CbService3::onEntry"] --> B["smacc::client_bases  
::SmaccServiceClient::call"]; A --> C["smacc::ISmaccClientBehavior  
::requiresClient"];
```

The diagram illustrates a state machine entry point, `sm_dance_bot::cl_service3::CbService3::onEntry`, which is highlighted with a gray background. From this entry point, two blue arrows point to subsequent actions. The top arrow points to `smacc::client_bases::SmaccServiceClient::call`, and the bottom arrow points to `smacc::ISmaccClientBehavior::requiresClient`.
