

```
sm_fetch_screw_loop  
_1::cl_move_group_interface  
::CpConstraintVirtualSideWall  
::CpConstraintVirtualSideWall
```

A diagram showing a call to the `smacc::ISmaccUpdatable::setUpdatePeriod` method. On the left, a grey box contains the code for a loop that iterates over a move group interface and calls `setUpdatePeriod` on a `CpConstraintVirtualSideWall` object. A blue arrow points from this box to a white box on the right, which contains the signature of the `setUpdatePeriod` method.

```
smacc::ISmaccUpdatable  
::setUpdatePeriod
```
