The diagram illustrates an inheritance relationship. At the top is a class box for `boost::statechart::event< EvWaypoint216 < TSource, TOrthogonal > >`. It has three horizontal compartments: the top one contains the class name, and the other two are empty. Below it is a class box for `cl_move_base_z::EvWaypoint216 < TSource, TOrthogonal >`. This box has three compartments: the top one contains the class name, the middle one contains the public attribute `+ waypointIndex`, and the bottom one is empty. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating that `cl_move_base_z::EvWaypoint216` inherits from `boost::statechart::event`.
