

boost::statechart::  
event< EvWaypoint111  
< TSource, TOrthogonal > >

```
classDiagram
    class BaseEvent["boost::statechart::event< EvWaypoint111< TSource, TOrthogonal > >"]
    class DerivedEvent["cl_move_base_z::EvWaypoint111< TSource, TOrthogonal >"]
    BaseEvent <|-- DerivedEvent
```

The diagram illustrates a generalization relationship between two event types. The base event is defined in the top box, and the derived event is defined in the bottom box. A blue arrow with an open triangular head points from the derived event to the base event, indicating inheritance or specialization.

cl\_move\_base\_z::EvWaypoint111  
< TSource, TOrthogonal >
