::PureSpinningLocalPlanner  
::initialize"]; B --> C["cl_move_base_z::pure  
_spinning_local_planner  
::PureSpinningLocalPlanner  
::reconfigCB"];
```

The diagram consists of three rectangular boxes connected by blue arrows pointing from left to right. The first box (left) and the second box (middle) have a white background and a black border. The third box (right) has a gray background and a black border. Each box contains C++ code for the `cl_move_base_z::pure_spinning_local_planner::PureSpinningLocalPlanner` class. The first two boxes show the `initialize` method, while the third box shows the `reconfigCB` method.

```
cl_move_base_z::pure  
_spinning_local_planner  
::PureSpinningLocalPlanner  
::initialize
```

```
cl_move_base_z::pure  
_spinning_local_planner  
::PureSpinningLocalPlanner  
::reconfigCB
```
