

```
sm_fetch_screw_loop
_1::cl_move_group_interface
::CpConstraintTableWorkspaces
::disableTableCollisionVolume
```

A diagram showing a transformation between two states. On the left, a gray box contains a list of symbols: 'sm_fetch_screw_loop', '_1::cl_move_group_interface', '::CpConstraintTableWorkspaces', and '::disableTableCollisionVolume'. A blue arrow points from this box to a white box on the right. The white box contains the same first three symbols, but the last one is replaced by '::update'.

```
sm_fetch_screw_loop
_1::cl_move_group_interface
::CpConstraintTableWorkspaces
::update
```
