The diagram illustrates an inheritance relationship. A base class, `boost::statechart::event< EvWaypoint179 < TSource, TOrthogonal > >`, is shown in a white box at the top. A derived class, `cl_move_base_z::EvWaypoint179 < TSource, TOrthogonal >`, is shown in a grey box at the bottom. A blue arrow with an open triangular head points from the derived class to the base class, indicating that the derived class inherits from the base class. The derived class has a public attribute `+ waypointIndex`.
