The diagram shows two class boxes. The top box is white and represents the base class `boost::statechart::event< EvWaypoint224 < TSource, TOrthogonal > >`. It has two empty compartments below the header. The bottom box is gray and represents the derived class `cl_move_base_z::EvWaypoint224 < TSource, TOrthogonal >`. It has a header with the class name, a compartment with the attribute `+ waypointIndex`, and an empty compartment at the bottom. A blue arrow with an open triangular head points from the bottom box to the top box, indicating inheritance.
