

```
boost::statechart::  
event< EvTopicInitialMessage  
      < TSource, TOrthogonal > >
```

The diagram shows two class boxes. The top box is for `boost::statechart::event< EvTopicInitialMessage < TSource, TOrthogonal > >` and has three empty compartments. The bottom box is for `smacc::default_events::EvTopicInitialMessage < TSource, TOrthogonal >` and contains `+ msgData` and `+ getEventLabel()`. A blue arrow points from the bottom box to the top box, indicating inheritance.

```
smacc::default_events  
::EvTopicInitialMessage  
< TSource, TOrthogonal >
```

```
+ msgData
```

```
+ getEventLabel()
```
