

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class Base["boost::statechart::event< EvGlobalError >"]
    class Derived["sm_dance_bot::EvGlobalError"]
    Base <|-- Derived
```

The diagram shows a class hierarchy. The base class, 'boost::statechart::event< EvGlobalError >', is represented by a white box with a thin purple border and is divided into three horizontal sections. The top section contains the class name. The derived class, 'sm_dance_bot::EvGlobalError', is represented by a grey box with a thick black border and is also divided into three horizontal sections. The top section contains the class name. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.

sm_dance_bot::EvGlobalError
