

```
boost::statechart::  
event< EvTopicMessage  
< TSource, TObjectTag > >
```

A UML class diagram showing inheritance. The base class is `boost::statechart::event< EvTopicMessage< TSource, TObjectTag > >`. The derived class is `smacc::default_events::EvTopicMessage< TSource, TObjectTag >`. The derived class has two public attributes: `+ msgData` and `+ getEventLabel()`. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.

```
smacc::default_events  
::EvTopicMessage< TSource,  
TObjectTag >
```

```
+ msgData
```

```
+ getEventLabel()
```
