The diagram illustrates an inheritance relationship. At the top is a white box representing the base class: boost::statechart::event< EvWaypoint210 < TSource, TOrthogonal > >. Below it is a grey box representing the derived class: cl\_move\_base\_z::EvWaypoint210 < TSource, TOrthogonal >. A blue arrow with an open triangular head points from the derived class box up to the base class box. The derived class box has three horizontal compartments: the top one contains the class name, the middle one contains the attribute + waypointIndex, and the bottom one is empty.
