The diagram illustrates a generalization relationship between two event classes. The top class, `boost::statechart::event< EvWaypoint247 < TSource, TOrthogonal > >`, is shown in a white box with a thin grey border. The bottom class, `cl_move_base_z::EvWaypoint247 < TSource, TOrthogonal >`, is shown in a grey box with a thick black border. A blue arrow with an open triangular head points from the bottom class to the top class, indicating that the bottom class is a specialization of the top class. The bottom class has a public attribute `+ waypointIndex` in its second compartment.
