    class BoostEvent["boost::statechart::event< EvWaypoint75< TSource, TOrthogonal > >"]
    class ClMoveBaseZEvent["cl_move_base_z::EvWaypoint75< TSource, TOrthogonal >"]
    ClMoveBaseZEvent --|> BoostEvent
    class ClMoveBaseZEvent {

```

The diagram illustrates an inheritance relationship. A blue arrow points from the bottom class to the top class. The top class is a template specialization of boost::statechart::event. The bottom class is a specialization of the top class, adding a public member variable named waypointIndex.
