

sm_three_some::StState2
::onSingleBehaviorTickCallback

```
graph LR; A[sm_three_some::StState2::runtimeConfigure] --> B[sm_three_some::StState2::onSingleBehaviorTickCallback];
```

A diagram showing a call from the `runtimeConfigure` method to the `onSingleBehaviorTickCallback` method. The `runtimeConfigure` method is in a white box on the right, and the `onSingleBehaviorTickCallback` method is in a gray box on the left. A blue arrow points from the white box to the gray box.
