

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvGlobalError >"]
    class sm_dance_bot_strikes_back["sm_dance_bot_strikes_back::EvGlobalError"]
    boost_statechart_event <|-- sm_dance_bot_strikes_back
```

The diagram illustrates an inheritance relationship. A white box at the top represents the base class `boost::statechart::event< EvGlobalError >`. A blue arrow points from a grey box at the bottom to the base class. The grey box represents the derived class `sm_dance_bot_strikes_back::EvGlobalError`. Both boxes are divided into three horizontal compartments. The top compartment of the white box contains the class name. The top compartment of the grey box contains the class name. The middle and bottom compartments of both boxes are empty.

sm_dance_bot_strikes
_back::EvGlobalError
