

```
boost::statechart::  
event< EvWaypoint119  
< TSource, TObjectTag > >
```

The diagram shows two class-like boxes. The top box is white and contains the text 'boost::statechart::event< EvWaypoint119 < TSource, TObjectTag > >'. The bottom box is gray and contains 'move_base_z_client::EvWaypoint119< TSource, TObjectTag >' followed by '+ waypointIndex' on a new line. A blue arrow with an open triangular head points from the bottom box to the top box, indicating inheritance.

```
move_base_z_client  
::EvWaypoint119< TSource,  
TObjectTag >
```

```
+ waypointIndex
```
