The diagram illustrates an inheritance relationship. At the top is a white box representing the base class `boost::statechart::event< EvWaypoint246 < TSource, TOrthogonal > >`. It has two empty compartments below the name. At the bottom is a grey box representing the derived class `cl_move_base_z::EvWaypoint246 < TSource, TOrthogonal >`. It has a compartment for the public member `+ waypointIndex` and an empty compartment below it. A blue arrow with an open triangular head points from the derived class box up to the base class box, indicating that `cl_move_base_z::EvWaypoint246` inherits from `boost::statechart::event`.
