The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint194< TSource, TObjecTag > >`, is represented by a white box with a black border and is divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The derived class, `cl_move_base_z::EvWaypoint194< TSource, TObjecTag >`, is represented by a gray box with a black border and is also divided into three horizontal sections. The top section contains the class name, the middle section contains the public attribute `+ waypointIndex`, and the bottom section is empty. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating that `cl_move_base_z::EvWaypoint194` inherits from `boost::statechart::event`.
