

boost::statechart::
event< EvWaypoint153
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint153< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint153< TSource, TOrthogonal >"]
    Base <|-- Derived
```

The diagram shows a base class box at the top with a light gray background and a derived class box at the bottom with a darker gray background. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The base class box has three horizontal compartments; the top one contains the text, while the other two are empty. The derived class box has three horizontal compartments: the top one contains the class name, the middle one contains a public attribute, and the bottom one is empty.
