

boost::statechart::
event< EvFail >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvFail >"]
    class sm_three_some_EvFail["sm_three_some::EvFail"]
    sm_three_some_EvFail --|> boost_statechart_event
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded class box for `sm_three_some::EvFail`. A blue arrow with an open triangle head points from this box to a white class box above it for `boost::statechart::event< EvFail >`. The white box is divided into three horizontal sections, with the top section containing the class name and the other two sections being empty.

sm_three_some::EvFail
