

boost::statechart::  
event< EvGlobalError >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvGlobalError >"]
    class sm_dance_bot_strikes["sm_dance_bot_strikes_back::EvGlobalError"]
    boost_statechart_event <|-- sm_dance_bot_strikes
```

The diagram illustrates an inheritance relationship. A white box at the top represents the base class `boost::statechart::event< EvGlobalError >`. A blue arrow points from a grey box at the bottom to the base class. The grey box represents the derived class `sm_dance_bot_strikes_back::EvGlobalError`. Both boxes are divided into three horizontal sections, with the top section containing the class name and the remaining two sections being empty.

sm\_dance\_bot\_strikes  
\_back::EvGlobalError
