The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvWaypoint239 < TSource, TOrthogonal > >`, is represented by a white box with a thin black border. It has two empty rectangular compartments below its header. The derived class, `cl_move_base_z::EvWaypoint239 < TSource, TOrthogonal >`, is represented by a gray box with a thick black border. It has a header compartment, a compartment containing the attribute `+ waypointIndex`, and an empty bottom compartment. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating inheritance.
