

boost::statechart::
event< EvFail >

```
classDiagram
    class Base["boost::statechart::event< EvFail >"]
    class Derived["sm_three_some::EvFail"]
    Base <|-- Derived
```

The diagram shows a class hierarchy. The base class, 'boost::statechart::event< EvFail >', is represented by a white box with a black border and is divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The derived class, 'sm_three_some::EvFail', is represented by a gray box with a black border and is also divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. A blue arrow with an open triangular head points from the top section of the derived class box to the bottom section of the base class box, indicating an inheritance relationship.

sm_three_some::EvFail
