

```
sm_fetch_screw_loop  
_1::cl_move_group_interface  
::CpConstraintVirtualSideWall  
::CpConstraintVirtualSideWall
```

A diagram showing a call to the `smacc::ISmaccUpdatable::setUpdatePeriod` method. On the left, a grey box contains the code for `sm_fetch_screw_loop`, which is a lambda function taking a `cl_move_group_interface` object and a `CpConstraintVirtualSideWall` object. An arrow points from this box to a white box on the right, which contains the `smacc::ISmaccUpdatable::setUpdatePeriod` method call.

```
smacc::ISmaccUpdatable  
::setUpdatePeriod
```
