```

The diagram illustrates three state machine entry points on the left, each with a black border, pointing via blue arrows to a single target box on the right. The target box, which has a gray background and a black border, represents a common multirole sensor behavior entry point. The arrows originate from the bottom-right of the first box, the right side of the second box, and the top-right of the third box, all converging on the left side of the target box.
