

boost::statechart::  
event< EvWaypoint111  
< TSource, TOrthogonal > >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvWaypoint111< TSource, TOrthogonal > >"]
    class cl_move_base_z_EvWaypoint111["cl_move_base_z::EvWaypoint111< TSource, TOrthogonal >"]
    cl_move_base_z_EvWaypoint111 --|> boost_statechart_event
```

The diagram illustrates an inheritance relationship. A blue arrow with a hollow triangular head points from the bottom class to the top class. The top class is defined in a white box with a gray border and is divided into three horizontal sections. The bottom class is defined in a gray box with a black border and is divided into three horizontal sections. The first section of the bottom class contains the class name and template parameters, the second section contains a public member variable, and the third section is empty.

cl\_move\_base\_z::EvWaypoint111  
< TSource, TOrthogonal >
