

```
boost::statechart::  
event< EvWaypoint164  
< TSource, TObjectTag > >
```

The diagram illustrates an inheritance relationship. A blue arrow points from the bottom class to the top class. The top class is a template specialization of boost::statechart::event. The bottom class is a template specialization of cl\_move\_base\_z::EvWaypoint164, which inherits from the top class. The bottom class has a public attribute waypointIndex.

```
cl_move_base_z::EvWaypoint164  
  < TSource, TObjectTag >
```

```
+ waypointIndex
```
