

```
cl_move_base_z::ClMoveBase  
Z::initialize
```

```
graph LR; A["cl_move_base_z::ClMoveBase  
Z::initialize"] --> B["smacc::client_bases  
::SmaccActionClientBase  
< move_base_msgs::MoveBaseAction  
>::initialize"]
```

A diagram showing a call from a client to a base class. A grey box on the left contains the code `cl_move_base_z::ClMoveBase` and `Z::initialize`. A blue arrow points from this box to a white box on the right. The white box contains the code `smacc::client_bases`, `::SmaccActionClientBase`, and `< move_base_msgs::MoveBaseAction` followed by `>::initialize` on the next line.

```
smacc::client_bases  
::SmaccActionClientBase  
< move_base_msgs::MoveBaseAction  
>::initialize
```
