The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint98< TSource, TObjectTag > >`, is represented by a white box with a black border. The derived class, `cl_move_base_z::EvWaypoint98< TSource, TObjectTag >`, is represented by a gray box with a black border. A blue arrow with an open triangle head points from the derived class to the base class, indicating that `cl_move_base_z::EvWaypoint98` inherits from `boost::statechart::event`. The derived class box also lists a public attribute `+ waypointIndex` in its second compartment.
