

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvGlobalError >"]
    class sm_dance_bot_strikes["sm_dance_bot_strikes_back::EvGlobalError"]
    sm_dance_bot_strikes --|> boost_statechart_event
```

The diagram illustrates an inheritance relationship. The base class, 'boost::statechart::event< EvGlobalError >', is shown in a white box with a black border. The derived class, 'sm_dance_bot_strikes_back::EvGlobalError', is shown in a gray box with a black border. A blue arrow points from the derived class to the base class, indicating that the derived class inherits from the base class.
