The diagram shows a base class box at the top with a light gray background and a derived class box at the bottom with a darker gray background. A blue arrow with an open triangular head points from the derived class to the base class. The base class box is divided into three horizontal sections; the top section contains the class name, while the middle and bottom sections are empty. The derived class box is divided into three horizontal sections: the top section contains the class name, the middle section contains the public attribute '+ waypointIndex', and the bottom section is empty.
