

```
boost::statechart::  
event< EvWaypoint100  
< TSource, TOrthogonal > >
```

The diagram shows a base class at the top and a derived class at the bottom. The base class is defined by a white box with a black border, containing the text 'boost::statechart::event< EvWaypoint100 < TSource, TOrthogonal > >'. The derived class is defined by a grey box with a black border, containing the text 'cl_move_base_z::EvWaypoint100 < TSource, TOrthogonal >' in the top section, '+ waypointIndex' in the middle section, and an empty section at the bottom. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.

```
cl_move_base_z::EvWaypoint100  
  < TSource, TOrthogonal >
```

```
+ waypointIndex
```
