

```
boost::statechart::  
event< EvActionFeedback  
< ActionFeedback, TObjectTag > >
```

A UML class diagram showing inheritance. A blue arrow points from the class 'smacc::default\_events::EvActionFeedback' to the class 'boost::statechart::event'. The 'boost::statechart::event' class has a template parameter 'TObjectTag' and a template argument 'ActionFeedback'. The 'smacc::default\_events::EvActionFeedback' class has two public attributes: 'client' and 'feedbackMessage'.

```
smacc::default_events  
::EvActionFeedback< ActionFeedback,  
                    TObjectTag >
```

```
+ client  
+ feedbackMessage
```
