The diagram illustrates an inheritance relationship. At the top is a box representing the base class `boost::statechart::event< EvWaypoint236 < TSource, TOrthogonal > >`. It has three horizontal compartments, with the first containing the class name. Below it is a box representing the derived class `cl_move_base_z::EvWaypoint236 < TSource, TOrthogonal >`. This box has three compartments: the first contains the class name, the second contains the public attribute `+ waypointIndex`, and the third is empty. A blue arrow with an open triangular head points from the derived class box up to the base class box, indicating that `cl_move_base_z::EvWaypoint236` inherits from `boost::statechart::event`.
