The diagram shows a base class box at the top with a light gray background and a derived class box at the bottom with a darker gray background. A blue arrow with an open triangular head points from the derived class to the base class. The base class box has three horizontal compartments; the top one contains the text 'boost::statechart::event< EvWaypoint158 < TSource, TOrthogonal > >', while the other two are empty. The derived class box has three horizontal compartments. The top compartment contains 'cl_move_base_z::EvWaypoint158 < TSource, TOrthogonal >', the middle compartment contains '+ waypointIndex', and the bottom compartment is empty.
