

```
boost::statechart::  
event< EvKeyPressC<  
    TSource, TObjectTag > >
```

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvKeyPressC< TSource, TObjectTag > >"]
    class cl_keyboard_ev_key_press_c["cl_keyboard::EvKeyPressC< TSource, TObjectTag >"]
    boost_statechart_event <|-- cl_keyboard_ev_key_press_c
```

The diagram shows two class boxes. The top box, representing the base class, is white with a thin black border and contains the text 'boost::statechart::event< EvKeyPressC< TSource, TObjectTag > >'. It is divided into three horizontal sections by thin lines. The bottom box, representing the derived class, is gray with a thick black border and contains the text 'cl_keyboard::EvKeyPressC< TSource, TObjectTag >'. It is also divided into three horizontal sections by thick lines. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating an inheritance relationship.

```
cl_keyboard::EvKeyPressC  
< TSource, TObjectTag >
```
