The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `boost::statechart::event< EvWaypoint224 < TSource, TObjectTag > >`. It has two empty rectangular sections below the text. A dark gray box at the bottom represents the derived class `cl_move_base_z::EvWaypoint224 < TSource, TObjectTag >`. It contains the attribute `+ waypointIndex` in its second section. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.
