The diagram illustrates an inheritance relationship. At the top is a white box representing the base class: `boost::statechart::event< EvWaypoint222 < TSource, TOrthogonal > >`. It has two empty compartments below the name. At the bottom is a grey box representing the derived class: `cl_move_base_z::EvWaypoint222 < TSource, TOrthogonal >`. It has two compartments below the name, the first containing `+ waypointIndex`. A blue arrow with an open triangular head points from the derived class box up to the base class box.
