The diagram illustrates an inheritance relationship. At the top is a white box representing the base class: boost::statechart::event< EvWaypoint119 < TSource, TOrthogonal > >. Below it is a grey box representing the derived class: cl\_move\_base\_z::EvWaypoint119 < TSource, TOrthogonal >. The derived class has an additional attribute: + waypointIndex. A blue arrow with an open triangular head points from the derived class box up to the base class box, indicating inheritance.
