

```
boost::statechart::  
event< EvWaypoint211  
< TSource, TOrthogonal > >
```

The diagram shows a class hierarchy. At the top is a class box for `boost::statechart::event< EvWaypoint211 < TSource, TOrthogonal > >`. It has three horizontal compartments: the top one contains the text, and the two below are empty. Below this is a class box for `cl_move_base_z::EvWaypoint211 < TSource, TOrthogonal >`. This box has three compartments: the top one contains the class name, the middle one contains the public attribute `+ waypointIndex`, and the bottom one is empty. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating inheritance.

```
cl_move_base_z::EvWaypoint211  
  < TSource, TOrthogonal >
```

```
+ waypointIndex
```
