

boost::statechart::
event< EvWaypoint251
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint251< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint251< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A base class box at the top contains the text 'boost::statechart::event< EvWaypoint251< TSource, TOrthogonal > >'. A blue arrow with an open triangular head points from a derived class box below to the base class box. The derived class box is shaded gray and contains the text 'cl_move_base_z::EvWaypoint251< TSource, TOrthogonal >' followed by a plus sign and 'waypointIndex' on the next line.

cl_move_base_z::EvWaypoint251
< TSource, TOrthogonal >

+ waypointIndex
