

smacc_sm_reference
_library/sm_packml/include
/sm_packml/states/st_unsuspending.h

```
graph BT; A["smacc_sm_reference_library/sm_packml/src/sm_packml_node.cpp"] --> B["smacc_sm_reference_library/sm_packml/include/sm_packml.h"]; B --> C["smacc_sm_reference_library/sm_packml/include/sm_packml/states/st_unsuspending.h"];
```

The diagram illustrates a dependency chain in a C++ project. It consists of three rectangular boxes arranged vertically, connected by blue arrows pointing upwards. The bottom box contains the file path for a C++ source file: 'smacc_sm_reference_library/sm_packml/src/sm_packml_node.cpp'. An arrow points from this box to the middle box, which contains the path for a header file: 'smacc_sm_reference_library/sm_packml/include/sm_packml.h'. Another arrow points from the middle box to the top box, which contains the path for another header file: 'smacc_sm_reference_library/sm_packml/include/sm_packml/states/st_unsuspending.h'. The top box has a light gray background, while the middle and bottom boxes have white backgrounds.
