The diagram illustrates an inheritance relationship. A base class box at the top, representing `boost::statechart::event< EvWaypoint127 < TSource, TOrthogonal > >`, is connected by a blue arrow with an open triangular head to a derived class box below it. The derived class box, representing `cl_move_base_z::EvWaypoint127 < TSource, TOrthogonal >`, is shaded gray and includes a public attribute `+ waypointIndex`.
