The diagram illustrates an inheritance relationship. At the top is a white box representing the base class `boost::statechart::event< EvWaypoint160 < TSource, TOrthogonal > >`. It has two empty rectangular compartments below the text. At the bottom is a grey box representing the derived class `cl_move_base_z::EvWaypoint160 < TSource, TOrthogonal >`. This box has three compartments: the top one contains the class name, the middle one contains the public attribute `+ waypointIndex`, and the bottom one is empty. A blue arrow with an open triangular head points from the top of the grey box to the bottom of the white box, indicating that `cl_move_base_z::EvWaypoint160` inherits from `boost::statechart::event`.
