The diagram illustrates an inheritance relationship. At the top is a white box representing the base class `boost::statechart::event< EvWaypoint213 < TSource, TOrthogonal > >`. It has two empty rectangular compartments below the header. At the bottom is a grey box representing the derived class `cl_move_base_z::EvWaypoint213 < TSource, TOrthogonal >`. It has three compartments: the first contains the class name, the second contains the public attribute `+ waypointIndex`, and the third is empty. A blue arrow with a hollow triangular head points from the top of the grey box to the bottom of the white box, indicating that `cl_move_base_z::EvWaypoint213` inherits from `boost::statechart::event`.
